

To whom it may concern:

I signed up on the NJ DO Not Call List and I love it. It has truly reduced the unwanted interruptions from the telephone. Prior to my signing up we received 5+ telemarketing calls a day. We tried Caller ID and using an answering machine to screen calls, but nothing worked. The calls would come in the middle of dinner, early morning on weekends and up until 9 pm during the week. It was so frustrating I was considering turning the phone off completely and using only cell phones. Since signing up for the NJ Do Not Call list, I now receive approx 2 telemarketers calls a week- usually for something I have requested. The DO Not Call List is the best service I have ever tried. Please do not limit it or change it in any way.
